§ 1 OVERVIEW

1.1 Product Summary

The Receipt & Invoice Generator is a web-based tool enabling freelancers, small businesses, and merchants to create, manage, send, and track professional receipts and invoices — without needing an accounting background or expensive software.

1.2 Problem Statement

- Manually creating receipts/invoices in Word or Excel — error-prone and unprofessional
- Losing track of which invoices have been paid or are overdue
- No simple way to send invoices directly to clients
- No centralised billing history for tax or audit purposes
- Re-entering business details on every new document wastes time
- No ability to dispute or regenerate past receipts/invoices when needed

1.3 Goals

- Reduce time to create and send a professional invoice to under 2 minutes
- Provide a clean, branded PDF and image output with zero design effort
- Give users instant visibility into payment status across all invoices
- Support one-off receipts (point-of-sale) and structured invoices (net terms)
- ◆ Onboard users once so their business details auto-populate every document
- ◆ Allow retrieval and regeneration of any past receipt or invoice

1.4 Non-Goals (v1)

- ✗ Full accounting / double-entry bookkeeping
- ✗ Payment processing
- ✗ Payroll management
- ✗ Inventory management

§ 2 TARGET USERS

Persona	Description	Primary Need
Freelancer	Designer, developer, writer billing clients	Quick invoice creation + payment tracking
Small Business Owner	Retail or service SMB with ≤10 staff	Receipts at point-of-sale + invoice history
Contractor / Tradesperson	Plumber, electrician, consultant	Itemised invoices with tax on mobile
Finance Admin	Office manager handling vendor billing	Bulk invoice management + export

§ 3.1 CORE FEATURES — v1 (MUST HAVE)

Invoice Creation

- FR-01 Create invoices from blank forms or saved templates
- FR-02 Fields: invoice number (auto), issue/due date, sender, recipient, line items, tax, discount, total
- FR-03 Multiple tax types (VAT, GST, Sales Tax) with configurable rates
- FR-04 Line items can be added, reordered, and deleted dynamically
- FR-05 Notes / payment terms free-text field

Receipt Creation

- FR-06 Generate a receipt for a completed transaction
- FR-07 Receipt fields: number, date, seller, buyer (optional), items, payment method, total paid
- FR-08 Receipts clearly distinguished from invoices in UI and output

Business Profile

- FR-09 Save business profile (name, address, email, phone, tax/reg number)
- FR-10 Saved profile auto-populates sender fields on every new document

Client Management

- FR-12 Save client records (name, email, address, contact person)
- FR-13 Saved clients selectable from dropdown when creating a document
- FR-14 Client list is searchable

PDF Generation & Export

- FR-15 Every invoice and receipt exportable as a professionally formatted PDF
- FR-16 PDF includes all fields, company logo, and branding colours
- FR-17 PDF is downloadable and shareable via a direct link

Document Management

- FR-18 All documents saved to a dashboard
- FR-19 Status labels: Draft, Sent, Paid, Overdue, Void
- FR-20 Search and filter by date range, status, client, and amount
- FR-21 Duplicate an existing document to create a new one

Sending & Sharing

- FR-22 Send invoice directly to client email from within the app
- FR-23 Email includes a hosted, read-only invoice link
- FR-24 Shareable link and WhatsApp share available for any document

§ 3.2 NEW FEATURES — v2 (MUST HAVE)

1 of 5

User Onboarding & Profile Setup

➔ NEW IN v2.0

- FR-25** First-time users guided through a 3-step onboarding flow: (1) Enter business details, (2) Upload logo, (3) Set default currency and tax rate
- FR-26** Onboarding data saved as the user's permanent business profile — no re-entry needed on subsequent sessions
- FR-27** A profile completion indicator shown on the dashboard, prompting users to fill in missing details
- FR-28** Users can edit their profile at any time from Settings
- FR-29** On every new document, all sender fields are pre-filled from the saved profile automatically

2 of 5

Business Logo & Branding

➔ NEW IN v2.0

- FR-30** Users can upload a business logo (PNG, JPG, SVG — max 2MB) during onboarding or from Settings
- FR-31** Uploaded logo rendered prominently on all generated invoices, receipts, and PDFs
- FR-32** Business name displayed in a large, styled font on the document header alongside the logo
- FR-33** Users can choose a brand accent colour that applies to document headings, table headers, and borders
- FR-34** Logo and brand colour persist across all documents without needing to re-upload per document

3 of 5

Document History & Regeneration

➔ NEW IN v2.0

- FR-35** All created invoices and receipts saved permanently in a searchable History view
- FR-36** Users can search history by: client name, document number, date range, amount, and document type
- FR-37** Each document in history shows its status (Paid, Unpaid, Void), date, client, and total at a glance
- FR-38** Any past document can be opened, reviewed in full, and regenerated (re-exported as PDF or image)
- FR-39** A 'Duplicate & Edit' action allows users to clone a past document and modify it for a new transaction
- FR-40** Documents can be voided or marked as disputed, with an optional note for internal reference

4 of 5

Invoice / Receipt Templates

➔ NEW IN v2.0

- FR-41** Four document templates available, each with a distinct visual layout and tone
- FR-42** Template 1 — Classic: Traditional two-column layout, clean serif fonts, formal/corporate clients
- FR-43** Template 2 — Modern: Full-width header with accent colour band, sans-serif, creative freelancers
- FR-44** Template 3 — Minimal: Ultra-clean, line-separator-based layout, black and white, fast to read
- FR-45** Template 4 — Bold: Large typography, prominent total callout box, retail and trade businesses
- FR-46** Users select their preferred template from Settings; selection applies to all new documents
- FR-47** Template previews shown as visual thumbnails before selection

5 of 5

Image Export (PNG / JPG)

➔ NEW IN v2.0

- FR-48** Every invoice and receipt can be exported as a high-resolution image (PNG or JPG) in addition to PDF
- FR-49** Image export resolution at minimum 1200px wide, suitable for WhatsApp, Instagram, and email
- FR-50** Users see two download options on every document: 'Download PDF' and 'Download Image'
- FR-51** Image output renders identically to the PDF — same layout, logo, colours, and template
- FR-52** WhatsApp share attaches the image directly as a media file (rather than a link) when image export is chosen

§ 3.3 ENHANCED FEATURES — v3 (SHOULD HAVE)

- FR-53** Recurring invoices — auto-generate and send on a schedule
- FR-54** Payment reminders — automated nudges for overdue invoices
- FR-55** Multi-currency support with live exchange rate lookup
- FR-56** Accept online payments via Stripe or Paystack integration
- FR-57** Bulk export — CSV or ZIP of PDFs/images for a selected date range
- FR-58** Client portal — clients view their invoice history via a private link

§ A PRD ENHANCEMENT ADDENDUM — v2.1

This addendum extends the PRD v2.0 with free-tier limits, mobile-first improvements, analytics, localisation, security, and monetisation hooks. Excludes Recommendation #9 (Stamp / Signature Support) as requested.

A1 — Free Plan Limits

FR-59	Free users can create up to 20 invoices/receipts per month
FR-60	Free users can save up to 50 clients
FR-61	Free users can use only 2 templates
FR-62	Free exports include a small 'Generated with PickInvoice' footer watermark
FR-63	Paid plans remove all limits and watermark

A2 — Offline Draft Mode

FR-64	Users can create invoices offline and sync when internet returns
FR-65	Drafts auto-save locally in browser/app storage
FR-66	Unsynced drafts show a 'Pending Sync' status

A3 — Mobile-First Quick Actions

FR-67	'Quick Receipt' mode creates a receipt in under 30 seconds
FR-68	Frequently used clients/items appear as suggestions
FR-69	Users can duplicate the last invoice instantly

A4 — Item / Product Library

FR-70	Users can save reusable products/services with price, tax, and description
FR-71	Saved items are searchable during invoice creation
FR-72	Frequently used items suggested automatically

A5 — Dashboard Insights

FR-73	Dashboard shows monthly revenue trend
FR-74	Dashboard shows unpaid vs paid totals
FR-75	Dashboard highlights top clients by revenue
FR-76	Dashboard shows invoices due this week

A6 — Invoice Viewed Tracking

FR-77	Track when a client opens an invoice link
FR-78	Show viewed date/time on document dashboard
FR-79	Email notification sent to user when invoice is viewed by client

A7 — Custom Invoice Number Formats

FR-80	Users can customise invoice prefixes and numbering format
FR-81	Example formats: INV-001, SAL-2026-0042

A8 — QR Code Verification

FR-82	Generated receipts include optional QR verification code
FR-83	QR opens hosted receipt page for authenticity verification

A9 — Multi-Language & Currency Localisation

FR-86	Users can select local number/date formats
FR-87	Currency formatting adapts per locale

FR-88 Future support for multi-language invoices

A10 — Smart Payment Status Automation

- FR-89** Users can manually record partial payments against an invoice
- FR-90** Invoice balance updates automatically after each recorded payment
- FR-91** Status changes to 'Partially Paid' when balance is outstanding

A11 — Public Invoice Page Branding

- FR-92** Hosted invoice pages include full business branding
- FR-93** Hosted pages are mobile-optimized
- FR-94** Clients can download PDF directly from the hosted page

A12 — Security & Abuse Protection

- FR-95** Rate limiting on invoice generation endpoints
- FR-96** CAPTCHA on account creation
- FR-97** Email verification required before sending invoices to clients
- FR-98** Temporary account suspension triggered by spam activity

A13 — Future Monetisation Hooks

- FR-99** Upgrade prompts shown contextually when free-tier limits are reached
- FR-100** Premium-only features visibly locked in the UI with upgrade CTA
- FR-101** Usage meter displayed on dashboard showing consumption vs plan limits

§ 4 USER STORIES

ID	As a...	I want to...	So that...
US-01	Freelancer	Create an invoice with my logo and branding	Clients see me as professional
US-02	Small business owner	Save client details once	I don't re-enter them every invoice
US-03	Contractor	Mark an invoice as paid	My dashboard shows accurate cash flow
US-04	Finance admin	Filter invoices by status	I can quickly identify overdue payments
US-05	Freelancer	Send an invoice directly from the app	No manual email switching needed
US-06	Business owner	Generate a receipt on the spot	I can hand proof-of-payment to walk-in customers
US-07	Any user	Export as PDF or image	I can share on WhatsApp or print a hard copy
US-08	Any user	See a dashboard summary	I know my total billed, received, and outstanding
US-09 ♦	New user	Complete onboarding once	My business details auto-fill every future document
US-10 ♦	Business owner	Upload my logo	Every invoice looks like it came from my brand
US-11 ♦	Merchant	Search past receipts by date or client	I can resolve payment disputes quickly
US-12 ♦	Freelancer	Regenerate an old invoice	I can resend or reprint without re-creating it
US-13 ♦	Any user	Choose from 4 templates	My invoice style matches my business personality
US-14 ♦	Any user	Download as a WhatsApp-ready image	I can send the receipt directly without a link

♦ Green rows = new user stories added in v2.0

§ 5 UX & DESIGN REQUIREMENTS

ID	Tag	Requirement
DR-01		Mobile-responsive — fully usable on screens ≥ 360 px wide
DR-02		Invoice creation completable in ≤ 5 taps/clicks from dashboard
DR-03		Inline validation with clear error messages (missing due date, invalid email)
DR-04		Dashboard summary card: Total Invoiced, Total Paid, Outstanding, Overdue
DR-05		PDF and image output polished at print resolution (300 DPI equivalent)
DR-06		Colour theme on documents matches the user's chosen brand colour
DR-07	NEW	Onboarding screens use a progress stepper (Step 1 of 3) with skip option
DR-08	NEW	Logo upload includes a live preview so users see how it looks before saving
DR-09	NEW	History view uses card/list layout with status chips and quick-action buttons (View, Regenerate, Duplicate)
DR-10	NEW	Template selection screen shows side-by-side thumbnail previews of all 4 templates
DR-11	NEW	Image export shows 'Copied to clipboard' / 'Saved to gallery' confirmation on mobile

§ 6 TECHNICAL REQUIREMENTS

Platform

- Web application — React or Next.js frontend
- REST or GraphQL API backend (Node.js / Python)
- Cloud storage for PDFs, images, and logos (S3-compatible)

PDF & Image Generation

- Server-side PDF rendering via Puppeteer, WeasyPrint, or equivalent
- Image export via html2canvas or Puppeteer screenshot at 2x resolution
- Client-side preview must match final PDF/image output pixel-for-pixel

Onboarding & Profile Storage ♦ NEW

- Business profile stored in user account database on first save
- Logo stored in cloud file storage; CDN-served URL referenced in document renders
- Profile data loaded into app state on every session start — no repeated API calls

Document History ♦ NEW

- All documents persisted in database with full field data, not just metadata
- History search indexed on: client name, doc number, date, amount, type, status
- Regeneration re-renders the stored data through the current template engine

Templates ♦ NEW

- Templates are HTML/CSS layout definitions, not static files — same data, different rendering
- Template selection stored in user preferences; applied at render time
- Adding new templates in future requires no schema changes

Authentication & Multi-tenancy

- Email/password and OAuth (Google) sign-in
- Each user account fully isolated — no cross-tenant data access

Data & Security

- All data encrypted at rest and in transit (TLS 1.2+)
- PII stored securely; GDPR-compliant deletion on request
- Invoice numbers unique per account and tamper-evident in outputs

Performance SLAs

- PDF/image generation completed in <3 seconds for standard documents
- Dashboard loads in <1.5 seconds with up to 500 documents
- 99.5% uptime SLA

§ 7 ANALYTICS & SUCCESS METRICS

Metric	Target (90 days post-launch)	Tag
Invoices created per active user / month	≥ 8	Core
PDF download rate	≥ 85% of created invoices	Core
WhatsApp / Image share rate	≥ 40% of created invoices	Core
User retention (D30)	≥ 35%	Core
Time-to-first-invoice (new user)	≤ 3 minutes	Core
Onboarding completion rate	≥ 80% of sign-ups	◆ New
Logo upload rate	≥ 60% of active users	◆ New
History search used (monthly)	≥ 30% of active users	◆ New
Image export vs PDF export ratio	Baseline established	◆ New
Template switch rate	≥ 25% users try multiple templates	◆ New

§ 8 RELEASE MILESTONES

Milestone	Scope	Target	Tag
Alpha	FR-01–17: core create + PDF	Week 6	
Beta	FR-18–24: dashboard + sharing	Week 10	
v1.0 Launch	All v1 Must-Have features + polish	Week 14	
v2.0 Sprint 1	FR-25–29: Onboarding + FR-30–34: Logo & Branding	Week 18	◆ NEW
v2.0 Sprint 2	FR-35–40: History & Regeneration	Week 21	◆ NEW
v2.0 Sprint 3	FR-41–47: Templates + FR-48–52: Image Export	Week 24	◆ NEW
v3.0	Recurring invoices, payments, multi-currency	Week 32	

§ 9 OPEN QUESTIONS

#	Question	Tag
Q1	Should invoice numbers be user-customisable (e.g., INV-2026-001) or system-generated only?	
Q2	Do we support multiple businesses per user account in v1?	
Q3	What is the pricing model — freemium (limited invoices/month) or flat subscription?	
Q4	Which payment gateways are prioritised for the Nigerian/African market (Paystack, Flutterwave)?	
Q5	Should the client-facing invoice view allow the client to add a comment or dispute?	
Q6 ♦	For image export, should the output be PNG (transparent background) or JPG (white background) by default?	Default
Q7 ♦	Should onboarding be skippable, and if skipped, when is the user prompted to complete their profile?	New
Q8 ♦	Can users create custom templates in a future version, or only choose from the 4 pre-built ones?	New
Q9 ♦	Should document history be stored locally (offline-first) or cloud-only?	New

§ 10 PRICING & PAYMENT SYSTEM

PickInvoice operates on a freemium model with three paid tiers. All payments are made via bank transfer to the PalmPay account below, and plans are activated via an automated verification code system.

10.1 Plan Comparison

Feature	■ Free	■ Starter ■1,000/mo	■ Growth ■3,000/mo	■ Pro ■5,000/mo
Invoices per month	20	50	Unlimited	Unlimited
Saved clients	50	200	Unlimited	Unlimited
Templates available	2	2	All 4	All 4 + custom
PDF export	✓ (watermark)	✓ clean	✓ clean	✓ clean
Image export (PNG/JPG)	✗	✓	✓	✓
Business logo & branding	✗	✓	✓	✓
WhatsApp share	✓ (link only)	✓ (image)	✓ (image)	✓ (image)
Document history	30 days	90 days	Unlimited	Unlimited
History regeneration	✗	✓	✓	✓
Offline draft mode	✗	✗	✓	✓
Item/Product library	✗	✗	✓ (50 items)	✓ Unlimited
Dashboard insights	Basic	Basic	Full analytics	Full analytics
Invoice viewed tracking	✗	✗	✓	✓
QR code verification	✗	✗	✓	✓
Custom invoice numbers	✗	✓	✓	✓
Partial payment recording	✗	✗	✓	✓
Branded hosted page	✗	✗	✓	✓
Email support	✗	✓	✓ Priority	✓ Dedicated
Multi-business accounts	✗	✗	✗	✓ (up to 3)
API access	✗	✗	✗	✓
Bulk export (CSV/ZIP)	✗	✗	✓	✓
Watermark on exports	Yes	No	No	No

■ WHY GROWTH (■3,000) IS THE SWEET SPOT

- ✓ Unlimited invoices & clients — never hit a wall mid-month
- ✓ All 4 templates unlocked — present to any client type with the right style
- ✓ Full document history — find, regenerate, or clone any past invoice instantly
- ✓ Offline mode — create invoices even without internet on the go
- ✓ Product library — save your services once, add them in one tap every time
- ✓ Dashboard analytics — know your top clients and revenue trends at a glance
- ✓ Invoice viewed tracking — know the moment your client opens the invoice
- ✓ QR code receipts — instant authenticity verification, zero disputes
- ✓ Bulk export — download your entire billing history in one click for tax season
- ✓ Only ■3,000/mo — half the cost of the Pro plan with 90%+ of the features

10.2 Payment Instructions

All payments are made via direct bank transfer to the account below. Once payment is confirmed, an activation code is automatically generated and sent to your registered email address within minutes.

BANK DETAILS — PALMPAY	
Account Name:	Abdulsalam Adewale Adelakun
Account Number:	8069904015
Bank:	PalmPay
Reference:	Your registered email address (REQUIRED)

Plan	Amount to Transfer	Duration
■ Starter	■1,000	Monthly
■ Growth (Recommended)	■3,000	Monthly
■ Pro	■5,000	Monthly

10.3 Activation Process

Step 1 — Transfer	Send the exact plan amount to the PalmPay account above. Use your registered email address as the payment reference/narration.
Step 2 — Automatic Detection	Our payment verification system checks for incoming transfers every 5 minutes. Your email reference is matched against registered accounts.
Step 3 — Code Generation	Once payment is confirmed, a unique 12-character activation code is generated and emailed to you instantly (e.g. PICK-A1B2-C3D4).
Step 4 — Activate Plan	Log in to PickInvoice → Settings → Upgrade Plan → Enter Activation Code. Your plan upgrades immediately upon validation.
Step 5 — Confirmation	You receive a confirmation email and your dashboard updates to show your new plan badge, limits, and unlocked features.

10.4 Manual Verification Fallback

If your activation code is not received within 30 minutes after payment, send your proof of payment (screenshot) and registered email to the support channel. A code will be issued manually within 2 hours during business hours (9 AM – 6 PM WAT, Monday – Saturday).

Codes are single-use, non-transferable, and tied to one account. Renewals follow the same process — a new code is issued each billing cycle.

§ 11 APPENDIX

11.1 Glossary

Term	Definition
Invoice	A request for payment with payment terms
Receipt	Proof of a completed, paid transaction
Line Item	A single product or service entry (description, qty, rate)
Net Terms	Agreed payment window — e.g. Net 30 = due 30 days after invoice date
Onboarding	First-time setup flow where users enter their business details once
Regeneration	Re-exporting a previously created document from saved history data
Template	A visual layout applied to document output — same data, different design
Activation Code	A unique 12-character code issued after payment to upgrade a plan

11.2 Template Design Directions

Template	Style	Font Approach	Best For
Classic	Two-column, structured	Serif headings + serif body	Law firms, consultants, formal B2B
Modern	Full-width colour header	Bold sans + light body	Agencies, creatives, tech freelancers
Minimal	Line separators only	Monospaced or thin sans	Developers, minimal-aesthetic brands
Bold	Large total callout box	Heavy display + regular body	Retail, food, trade businesses

11.3 Competitive Landscape

Product	Strength	Weakness
Wave	Free, full accounting	Complex for simple use cases
Invoice Ninja	Open-source, flexible	Steep learning curve
PayPal Invoicing	Integrated payments	Tied to PayPal ecosystem
Zoho Invoice	Feature-rich	Subscription cost
PickInvoice ★	Onboarding, templates, image export, WhatsApp-native invoicing payments (v1)	

11.4 Strategic Positioning Statement

"PickInvoice — the fastest WhatsApp-friendly invoice and receipt generator for mobile businesses."

Mobile-first workflows	Fast invoice generation	WhatsApp-native sharing	Lightweight UX for SMEs	Social-share optimised exports
